

Gamified Personal Tracker System

This document outlines the design and architecture of a gamified personal activity tracking system.

Core Concept

User logs activities. Each activity grants XP. XP contributes to skill levels, streaks, and achievements.

Entities

Activity: id, name, category

LogEntry: id, activity_id, start_time, end_time, duration

Skill: id, name, xp, level

XPLog: id, activity_id, xp_earned, timestamp

Achievement: id, name, description, condition

XP Formula

$XP = \text{time_spent_minutes} * \text{multiplier}$

Level Formula

$XP_required = 100 * (\text{level} ^ 1.5)$

Features

- Start/Stop tracking
- Daily stats dashboard
- Skill leveling system
- Streak tracking
- Achievements

Future Enhancements

- AI insights
- Smart XP boosts
- Social leaderboard
